

# Walker 2.0™

## Compact Payment Acceptance Device

**Walker™ is a rugged and compact payment acceptance device that transforms smartphones, tablets and PCs into highly-secure, fully-functioning mPOS solutions.**

Walker is EMV L1 and L2 compliant and supports both Chip & Signature and magnetic stripe payment technologies.

Walker employs the latest end-to-end encryption technology to ensure secure and reliable operation in mobile POS applications.

Walker connects to a phone or tablet using your choice of Bluetooth, audio jack or micro USB technology. A removable sticky pad is available to firmly adhere the Bluetooth version to a device for convenience.

It supports over-the-air firmware and key injection updates, ensuring frictionless field-level changes.

The device can be integrated with POS and payment apps using our intuitive API and SDK developer tools, or AnywhereCommerce can provide a turnkey mobile payment app.

## Features & Benefits

### EMV Certified

Enables merchants to accept EMV Chip & Signature payments as well as magstripe payments

### Certifications

EMV Level 1 and Level 2 certified, Certified Visa Ready, Mastercard MPOS and Amex Enabled

### Connectivity

Choice of device with Bluetooth/Micro USB or Audio Jack/Micro USB

### Robust Security

Encryption technology ensures secure and reliable operation in mPOS applications

### Remote Support

Over-the-air firmware updates and remote key injection facilitate field-level upgrades

### Flexible

Compatible with most mobile smartphones and tablets
